Gas Duct and Coil

Our traditional, unperforated, yellow, single layer, gas coils are extruded from medium density polyethylene (MDPE) PE80. MDPE has a higher long term stress, crack resistance than HDPE PE80. The product is approved to BS6572 -1985, BS6730 - 1986 and GIS/PL2 - Part 2 2006.

PE100 pipe is also available, extruded from higher performance polyethylene (HPPE). It differs from PE80 MDPE pipe, in that it demonstrates outstanding resistance to rapid crack propagation (60°C to -30°C). The product is approved to BS EN 12201, BS EN 13244, WIS 4-32-17 and GIS/PL2 Part 8-2006.

Coils are supplied in 50 or 100m lengths. Diameters from 20 to 180mm. Pipe, supplied in 6, 12 and 20m lengths, is available to 630mm diameter.

Don't forget the marker tape

Maximum Gas Pressure Ratings for PE80

SDR11	5.5 bar	subject to de-rating in sizes 180mm and above
SDR17.6	3.0 bar	subject to de-rating in sizes above 250mm
SDR26	2.0 bar	

Maximum Gas Pressure Ratings for PE100

SDR11	7.0 bar	
SDR17.6	4.0 bar	
SDR21	2 bar	

PE80 MPDE gas duct is available as
 Coils: 20mm in SDR9
 Coils: 25 to 180mm in SDR11
 Duct 6 & 12m: 63 to 630mm in SDR11 & SDR17.6

Perforated, 50m length gas
 coils, kite-marked to BS 4962
 are available in 60 to 160mm
 diameters.

Gas fittings, including compression fittings, are available to order.
