## POLYETHYLENE PIPE

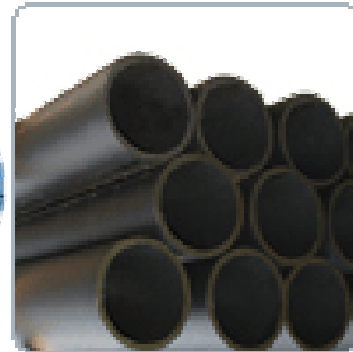

Also termed higher performance polyethylene (HPPE) pipe, it differs from PE80 medium density polyethylene (MDPE) pipe in that it demonstrates exceptional resistance to rapid crack propagation (60°C to -30°C) as well as to long term stress cracking.

Our standard single layer pipe is extruded in the following colours:-

Blue - For potable water supply below the ground

Black - For global water and gas supplies, UK potable water supplies above the ground and industrial (sewerage, mining, and quarry) applications above and below the ground

We also stock barrier pipes such as protectline and puriton in all sizes and fittings.

Available in 90mm – 1200mm in SDR 11, 17, 21 and 26 Approved to BS EN 12201, BS EN 13244, WIS 4-32-17 and GIS/PL2 Part 8-2006 Available in 6m and 12m straight lengths, additional lengths are available on request Available in 50m and 100m coils sizes 90mm to 180mm
