

Meter Boxes

Meter boxes are normally a necessity for new meter installations today. The **“Utility Connectors”** will only connect a meter into an approved meter box and often their requirements differ in terms of size, cable entry and exit positions.

Generally manufactured from GRP, **Cirrus** supply meter boxes which have the full approval of most of the gas and electricity suppliers in the UK.

A selection of boxes for domestic, industrial and commercial applications are shown below.

Please contact us to discuss your specific requirements.

- Used & approved by most utility providers
- Gas & Electricity
- Domestic & Industrial
- Flush, surface & semi buried
- Hockey sticks
