

Polysewer/ Ridgisewer

Polysewer and **Ridgisewer** are tough, chemical and gas resistant pipes for new and replacement gravity fed sewerage systems.

The range of integrally socketed pipes, with diameters from **150 - 600mm**, include a complete system of couplings, seals, bends, junctions and specialist fabrications.

In addition to having superior impact and abrasion resistance, with immunity from sulphate attack or corrosion due to sewer gases, they are robust and light weight, making them quick and easy to install. An ideal alternative to concrete. Both products have **BBA Certificates** and are manufactured, in accordance with their respective **Kitemark Licences**, to **WIS 4-35-01**.

	Nominal Size (mm)	ID (mm)	OD (mm)	Length
Polysewer	150	146	160	3m
	225	229	250	3m
	300	301	330	3m
Ridgisewer	400	400	457	3m
	450	450	511	3m
	500	500	568	3m
	600	587	672	3m
