

Ridgiduct

Ridgiduct is manufactured from HDPE (High Density Polyethylene) and is a lightweight yet robust alternative to other ducts. It is the preferred choice for the electricity DNO's (Distribution Network Operators) in the UK.

This ducting carries **ENATS 12-24 CLASS 2** approval, as well as **PADS** (Network Rail), **HAPAS** (Highways Authority) and full **BBA** approval.

If a sealed system is required, separate couplers and sealing rings can be supplied to ensure the duct is watertight. **Ridgiduct** is also available as a split duct for use with existing cables.
